## *All India Institute Of Medical Sciences, Jodhpur*

AIIMS Jodhpur is one of the SIX NEW AIIMS established by the Ministry of Health & Family Welfare, Government of India, under the Pradhan Mantri Swasthya Suraksha Yojna (PMSSY) with the aim of correcting regional imbalances in quality tertiary level healthcare in the country and attaining self-sufficiency in graduate and postgraduate medical education. PMSSY planned to set up 6 new AIIMS like institutions in under-served areas of the country.

These institutions are established by an Act of Parliament on the lines of the original All India Institute of Medical Sciences in New Delhi which imparts both undergraduate and postgraduate medical education in all its branches and related fields, along with nursing and paramedical training to bring together in one place educational facilities of the highest order for the training of personnel in all branches of health care activity

Tribal Healer

*Highlights*

# Tribal Telemedicine

- Monday through Friday every week Providing and facilitating enhanced clinical care using telemedicine, overseen and directed by the faculty of AIIMS Jodhpur, for tribal individuals without access to treatment from local practitioners within the current state health framework.
- Telemedicine implementation at Health and Wellness Centres in this village (spokes) is linked with the Satellite Centre for Tribal Health and Research AIIMS Jodhpur (Hubs) to help address the shortage of doctors and other healthcare professionals, as telemedicine enables access to super-specialist services from hubs to patients in inaccessible, hard-to-reach tribal areas.

# Outreach Activity

- An initiative by STHR Abu Road conducts weekly health awareness activities and mobile outreach clinics in tribal areas of the Sirohi district. A fully equipped van, staffed with medical officers and nursing staff, delivers accessible healthcare services directly to underserved communities.
- Project DREAM Care is an exploratory study designed to harness the potential of Unmanned Aerial Vehicles, or drones, in transforming healthcare delivery in tribal regions.

## DHANI (ढाणी) (Delivering Healthcare Among Native using Innovation)

## DREAM Care (DRonE Assisted Medical Care)

# School Health

- This provides the foundation for implementing an effective, adolescent-friendly awareness program for identifying common health problems among EMRS (Eklavya Model Residential School) in Sirohi, Rajasthan.
- This Initiative demonstrates the effectiveness of a comprehensive approach in reducing scabies prevalence and promoting hygiene practices among tribal adolescents.

## HARSH (हर्ष)

(Healthcare Access by Residential Tribal Schools & Hostels)

## SPARSH (स्पर्श)

(Scabies Prevention And Relevance of Sanitation & Hygiene)

## Menstrual Hygiene Awareness Activity

# ROAR Program

- AIIMS Jodhpur has initiated a program to offer residents a distinctive educational opportunity to comprehend the health challenges encountered by tribal communities in district Sirohi. Residents will recognize the distinctive problems and inequalities in tribal healthcare delivery. Resource-constrained environments further facilitates innovative approaches or solutions to healthcare delivery.

of Health  
Education &  
Promotion**

**10 Research  
publications**

**~600  
pregnant  
tribal  
women  
screened  
for Anemia**

## *About Us*

All India Institute of Medical Sciences, Jodhpur is recognized as a “Centre of Excellence (COE) for Tribal Health” by the Ministry of Tribal Affairs, Govt. of India. In order to address the health needs of the tribal people, a unique Centre was conceptualized to holistically approach the health problems and devise a road map to address the gap using modern scientific tools. A “Satellite Tribal Centre (STC)” was established at Janjati Bhavan Abu Road in collaboration with the Tribal Area Development (TAD) Department, Govt. of Rajasthan and MLV Tribal Research & Training Institute, Udaipur and was funded by the Ministry of Tribal Affairs, Govt. of India.

The STC is a unique initiative with the amalgamation of health care services and innovative research for the tribal population in a participatory ecosystem whereby tribal people play a significant role in navigating their own health issues as stakeholders.

STC aims to improve the overall health status of the tribal population residing in the tribal sub-plan (TSP) zone of an “aspirational” district, Sirohi, Rajasthan, by reinforcing existing healthcare services, spreading health education & health promotion for disease prevention.
